## PROFESSIONAL SUMMARY

---

Software Engineer with 7+ years of professional web development experience and a background in UX design and teaching, specializing in frontend development and user-centered product experiences. Experienced with full-stack development in React, TypeScript, Python, and REST APIs. Enjoys combining technical problem-solving with empathy, accessibility, and thoughtful design to translate complex problems into intuitive experiences.

## SKILLS

---

**Programming Languages:** HTML, CSS, JavaScript, TypeScript, Python

**Frontend:** React, Next.js, Tailwind CSS, Jest, Cypress

**Backend:** Node.js, Express, Flask, REST APIs, MongoDB, Netlify (Blobs, Functions)

**Design:** Figma, UX/UI Design, Design Systems, Prototyping

**Other Tools:** Git, GitHub, GitHub Actions, Google Tag Manager

## WORK EXPERIENCE

---

**Software Engineer, [Nom Nom](#)** | Mar 2022 - Present

- **Led the end-to-end launch of a new product type**, translating complex business requirements into a technical approach, project timeline, and implementation plan, coordinating QA across stakeholders, and shipping the product on time with minimal issues.
- **Launched a full website redesign** with the Product and Marketing teams, building shared funnel components that improved UI consistency and developer productivity and supporting nationwide retail and influencer campaigns.
- **Redesigned the Customer Account App**, building 18 shared components, 9 pages, and 2 user flows with React, TypeScript, and Tailwind CSS, establishing a consistent, maintainable frontend architecture.
- **Conducted user research interviews with CX stakeholders** to identify workflow pain points and shape requirements and scope for an upcoming admin app overhaul.
- **Implemented custom tracking events with Google Tag Manager** across product pages and signup flows, translating marketing requirements into actionable customer insights.
- **Reworked the self-cancellation flow frontend and backend**, improving customer experience through an updated UI and modernizing the backend with a model-based Python architecture, improving churn data and enabling more targeted retention campaigns.

**Web Designer & Developer, Shepherd Research Lab** | Mar 2019 - Aug 2021

- **Built and launched 3 WordPress websites** for lab services, research studies, and emerging AI initiatives, using custom HTML and CSS to support study recruitment and new project collaborations.
- **Led branding and digital design for a 200+ participant conference**, creating the website, print materials, and attendee welcome resources to increase event visibility and engagement.

## SELECTED PROJECTS

---

**Animal Crossing API** | Next.js, React, TypeScript, REST API | [Live Prototype](#) | [Code Repo](#)

Built a REST API prototype for Animal Crossing data and a Next.js app that consumes it, exploring data modeling and API design.

**Reuben Sandwiches** | Astro, Tailwind CSS, GitHub Actions | [Live Demo](#) | [Code Repo](#)

Built a responsive website for a curated list of local Reuben sandwiches using Astro for static site generation and Content Collections for structured content management, published on GitHub Pages.

**Min To Win** | JavaScript, React, ExpressJS, Material UI, Netlify, REST API | [Live Demo](#) | [Code Repo](#)

Built a full-stack React and Express web app featuring a wiki for ~100 Minute To Win It games, with a REST API and docs to query the database.

## EDUCATION

---

**B.S. Human Centered Design & Engineering** | University of Washington, Seattle, WA
